Shining a light on tissue repair

TISSIUM is a privately-owned medtech company based in Paris, France that is dedicated to the rapid development and commercialization of a unique biopolymer platform to address various unmet clinical needs.

The company's platform is based on a proprietary polymer family with unique properties including the ability to conform to and integrate with surrounding tissue to enable tissue reconstruction. Furthermore, the polymer building blocks enable customization to match tissue-specific requirements for different therapeutic areas. The company is developing a portfolio of solutions for peripheral nerve, gastrointestinal, ENT and cardiovascular applications. The company also develops delivery and activation devices for enhanced performance and usability of its family of polymers.

Maria PEREIRA

Chief Innovation Officer at TISSIUM
